Fixes the Uncontrolled Blood Sugar Readings

ACARFIX™-25/50

Acarbose 25mg / 50mg Tablet

White
Die-Cutting

Excellent oral antidiabetic, antihyperglycemic agent, an alpha-glucosidase inhibitor.

Acarbose plays an essential and direct role in carbohydrate uptake from food into blood.

It reduces the increase in blood glucose via intake in doing so modulates insulin secretion.

To ensure maximum efficacy Acarbose must be taken directly at onset or during meals.

Effective for long term use, with its subsequent metabolic effects.

Benefits are maintained over several years without evidence of a decrease in pharmacological activity.¹

It as an effective pharmacological option for preventing diabetes in a prediabetic patient.²

SAFETY OF ACARBOSE TREATMENT

No sign of potential cardiovascular harm was observed in clinical studies.
The high degree of safety concerning severe side effects such as hypoglycemia.

Acarbose treatment does not have any effect on body weight.

No severe and fatal adverse effects were seen in post-market surveillance.³
